PRODUCT DESCRIPTION

Twin-axle light trailer VESTA Light 25ZDA -- GVW 750 kg

VESTA Light 25ZDA is a twin-axle light trailer in the Witmar range, intended for building supplies, tools, luggage or garden equipment. It is an option for buyers matching a particular trailer to a planned transport task and comparing it with other models in the same class.

Car trailer for home, garden and everyday transport

A small car trailer is useful when items do not fit in the boot or should be kept separate from the car interior. For tools, bagged materials and household equipment, consider the complete load rather than just the largest individual item. Choose a trailer around the journeys you actually make instead of relying on a model-series name.

Compare the bed dimensions with the largest item you intend to carry. A shorter bed may suit tools, while boards, furniture and long items require a separate check of usable length and securing points.

Choosing a light trailer for your usual loads

If the trailer will serve both a household and a small business, compare your everyday load with the largest item carried occasionally. This helps establish whether the bed suits future uses as well. When buying a light trailer, assess dimensions, cargo mass and securing arrangements together rather than choosing solely by overall size.

This version of VESTA Light 25ZDA has a gross vehicle weight limit of 750 kg. This covers the trailer together with its load; it is not the mass of cargo that can be carried on its own.

Gross vehicle weight is not payload: the trailer itself uses part of the permitted total mass. Check dimensions and carrying capacity before specifying side extensions, a cover or other accessories.

Choosing VESTA Light 25ZDA from the Witmar range

When searching for a twin-axle light trailer, compare how the load space will be used as well as the axle arrangement. The right version should match the intended load and frequency of transport. The construction name alone does not establish suitability for every task.

Before buying, explain what you intend to carry, how often the trailer will be used and the dimensions of the largest item. This helps compare versions against real needs rather than only overall size or a model name. Witmar can help confirm the chosen configuration, current price and availability.

Compare other models in this category: light trailer.
